

Panopto Focus

Euroopa Liit
Euroopa Sotsiaalfond

Eesti tuleviku heaks

Feature	Description	Focus Core	Focus
Windows Recorder	Ability to record audio/video, PowerPoint, screen capture from Windows.	●	●
One Touch Recording	Remember your recording preferences making it a one-click process to begin and end a recording.	●	●
Fail-Safe Uploads	Recordings will continue to upload to your server, even if you've closed the Recorder application.	●	●
Public and Private Notes	Students, faculty and designated note-takers can take notes and either keep them private or publish them for the entire class to view and search.	●	●
Attach PDFs	PDF documents can be attached to a recording, automatically appearing in the viewer interface as additional source tabs.	●	●
Hi-Resolution Screen Videos	Users can create high-quality recordings simply by capturing what's happening on your screen.	●	●
Note Hyperlinks	Presenters can refer their audiences to outside material or other recordings by inserting a link in the Notes section.	●	●
Basic Podcasting	Automatic creation of RSS feeds and audio (mp3) files which viewers can listen to on portable media devices such as iPhones or iPods.	●	●

Viewing Analytics	With Panopto Focus 3.0 Analytics, presenters can find graphs and data on what viewers are watching their recordings, how frequently they watch, and which parts of a particular recording are most viewed. Administrators can export viewing statistics from Panopto in .csv format for increased analysis and evaluation.	●
Live Broadcasting	The recorder includes a broadcast check box - when checked, a hyperlink is provided in the Recorder that can be shared with off-site viewers. Viewers can watch the recording in process (on a 10-15 second delay) and send questions through the viewer that appear in the Recorder interface. Recordings can also be scheduled in advance providing a broadcast URL.	●
Enhanced Administration	Administrators can import users directly from already existing Active Directory Security Groups to eliminate the need to re-enter existing user groups. Panopto's archiving features empower administrators to manage and archive users with just a few clicks.	●
Closed Captioning	Users can sign up to receive human-generated closed captions from Automatic Sync Technologies (AST), a leader in automatic captioning. Requires an AST account (AST will charge for their service independently).	●
Enhanced Blackboard and Moodle Integration	This includes single sign on, provisioning of courses from the learning management system to Panopto Focus, and automatic publishing of recordings from Panopto Focus to Blackboard.	●
Web-Based Exporting	Download an offline copy of presentations directly from the Web interface.	●

Scheduling/Remote Recorder	Users can schedule recordings to begin and end at specific times as well as trigger recordings from different locations. Scheduled recordings can be configured to generate live broadcast URLs that can be posted or shared with remote viewers.	●
Upgraded Recorder for PCs and Macs	Users can record audio/video, PowerPoint/Keynote from a PC or Mac. Other features include a high performance screen capture tool for Windows 7 users and a Pause button.	●
Browser-Based Editor for PCs and Macs	Panopto's browser-based editor includes a redesigned user interface to make editing quick and easy. It can be accessed from any computer with an Internet connection and requires minimal training.	●
Advanced Video Podcasting for Mobile Devices	Panopto Focus 3.0 allows users to browse recordings and stream MP4 versions of new recordings directly from their mobile device. Recordings created with previous software versions will fade from video to PowerPoint slides. If screen capture is present, it will show what was on screen and you will be able to hear the audio.	●
Global Search Capability	The new Web interface allows users to search, sort and store recordings to make knowledge retrieval quick and easy. A new search bar lets users search across all available content, while the streamlined interface provides viewers, presenters and administrators with increased sorting capabilities.	●
